A vibrant starfield with a blue nebula on the right side. The background is a deep black space filled with numerous small, multi-colored stars (red, orange, yellow, blue, white). A prominent bright blue star is located in the center-left. On the right side, there is a large, glowing nebula with shades of blue, cyan, and yellow. Two bright red stars with diffraction spikes are visible, one in the upper right and one in the lower center.
