1. The Concepts of Physics course for Juniors and Seniors completed 4 units on Scuba Physics during the third quarter. They have learned about scuba diving along with the physics involved in scuba diving. Some of the topics include Archimedes' Principle, Boyle's Law, Charles' Law, Dalton's Law of Partial Pressure, Henry's Law, Combined Gas Law, and the Ideal Gas Law. They have also learned about how these affect a diver. Finally, they went on a field trip to Bemidji State Recreation Center to put on gear and experience scuba diving for themselves. Twelve students participated and all earned their way to the deep end of the pool by learning to clear their mask of water, clear their regulator of water and ditch their regulator, find it and clear it again to resume normal breathing. They performed all these skills while staying underwater.
